

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A 1-methylcarbapenem derivative of formula (I-1) in crystalline form $[[:]]_1$,
wherein the crystalline form shows main peaks at interplanar spacings $d=6.65, 5.68, 4.86, 4.57$ and 4.03 \AA in the X-ray powder diffraction pattern obtained with a Cu K_α irradiation of $\lambda=1.54 \text{ \AA}$, the main peaks having relative intensities not less than 74, relative to the intensity of the peak at 4.57 \AA which is evaluated as 100

Appl. No. 10/625,317

2. (Original) A 1-methylcarbapenem derivative of formula (I-2) in crystalline form:

3. (Original) A 1-methylcarbapenem derivative of formula (I-3) in crystalline form:

Claim 4 (Canceled).

5. (Original) A solid pharmaceutical composition for the prevention or treatment of bacterial infections comprising a therapeutically effective amount of a 1-methylcarbapenem derivative of formula (I-1) in crystalline form as claimed in claim 1 as an active ingredient together with a diluent or carrier therefor.

6. (Original) A solid pharmaceutical composition for the prevention or treatment of bacterial infections comprising a therapeutically effective amount of a 1-methylcarbapenem derivative of formula (I-2) in crystalline form as claimed in claim 2 as an active ingredient together with a diluent or carrier therefor.

7. (Original) A solid pharmaceutical composition for the prevention or treatment of bacterial infections comprising a therapeutically effective amount of a 1-methylcarbapenem derivative of formula (I-3) in crystalline form as claimed in claim 3 as an active ingredient together with a diluent or carrier therefor.

Claim 8 (Canceled) .

9. (Original) A method for preventing or treating bacterial infections which comprises administering to a warm-blooded animal in need of such prevention or treatment a pharmacologically effective amount of a 1-methylcarbapenem derivative of formula (I-1) in crystalline form as claimed in claim 1.

10. (Original) A method for preventing or treating bacterial infections which comprises administering to a warm-blooded animal in need of such prevention or treatment a pharmacologically effective amount of a 1-methylcarbapenem derivative of formula (I-2) in crystalline form as claimed in claim 2.

11. (Original) A method for preventing or treating bacterial infections which comprises administering to a warm-blooded animal in need of such prevention or treatment a pharmacologically effective amount of a 1-methylcarbapenem derivative of formula (I-3) in crystalline form as claimed in claim 3.

Claim 12 (Canceled) .
